

Floor drain / Channel drains and square channel drains *Ferrofix* made in stainless steel AISI 304

The stainless steel solution.

Our *Ferrofix* drains made of stainless steel are particularly durable solutions for drainage in commercial rooms in which hygiene requirements apply. The stainless steel grade AISI 304 (AISI 316L on request) makes the drain suitable for use in areas with the highest standards, for example, in food processing companies or swimming pools.

Our channel drains and square channel drains are available as Express or modular versions and in different lengths. In general the length is up to six metres, other dimensions can be supplied if necessary. On request, we also develop individual solutions, which we also tailor to your requirements.

- ① *Ferrofix* drain body
- ② Upper section with anti-slip cover
- ③ Pressure sealing flange for waterproofing layer

Floor drain

Renovation with *Ferrofix*

On request, the *Ferrofix* is also available as an extremely flat model made of AISI 304 stainless steel – ideal for renovation projects. With low installation depths from 100 to 107 mm, the renovation models are particularly compact. The one-piece drains are supplied with optional connection flange or glued flange.

With our modular systems 125 and 200, we provide numerous possible combinations for our project drains.

- Upper sections system 100: page 246
- Modular system 125: pages 246 – 247
- Modular system 200: pages 248 – 249
