

Yard drains

The load resistant drain for outdoor use.

We supply yard drains not only made of polymer but also made of *Ecoguss*, our high-tech composite, which combines the specific advantages of polymer and metal. They are available in different load classes and can be driven on by vehicles weighing up to 40 tonnes.

- 1 System 400 drain body
- 2 Height-adjustable upper section with cover
- 3 Sludge basket

- 1 Upper section and cover
- 2 Concrete
- 3 Sludge basket
- 4 Locking system

Break-proof & load resistant

Our yard drains are absolutely break-proof and fulfil different load classes up to D. They can therefore be loaded with up to 40 tonnes and can be easily driven on by cars and/or trucks.

Flexible installation options

Thanks to their unique rotatable, tiltable and up to 350 mm height-adjustable telescopic upper sections, our yard drains can be adjusted exactly to the required ground level.
