

Grease separator EasyClean ground NS 1, Auto Mix & Pump, 1520-1700 mm, D

Article information

Item no.: 93001/170D-PVS-TS GTIN: Price group: 60

Advantages

- Fully automated disposal and rinsing device
- Customisation possible through control unit
- Clean and odour-free disposal and cleaning

Description

The separator for greasy wastewater for underground installation consists of a grease separator and an engineering chamber. The two-piece system made of permanently resistant polymer (PE) is equipped with an integrated sludge trap and an integrated sampling device. Access for cleaning and maintenance work is provided by inspection openings, with polymer upper sections for continuously adjustable height and level compensation. The innovative Shredder-Mix-System with integrated macerating system is responsible for homogenising and circulating the tank contents. Cleaning and odour-neutral disposal takes place via an exterior submersible pump which is installed in a separate engineering chamber and can be disconnected from the tank by a shut-off valve. The fully automatic program run is controlled by a user-friendly control unit with multi-line display that can be integrated into the building management system through a potential-free contact. The control unit with 10 m long cable is installed in the engineering chamber in the factory. Cleaning and disposal can be started remotely using the remote control. Thanks to the customisable cleaning program with fast-selection function, cleaning can be adapted to the local circumstances as required. Observance of the Drinking Water Hygiene Directive can be guaranteed through the fully automatic rinsing of the drinking water pipes. The refill inlet and solenoid valves must be installed in a dry room on site. The connections between the grease separator and the engineering chamber as well as the reserve conduits and the connections must be made on site. (see connection set 917421). A load distribution slab must be installed on site for load class D. The reinforcement drawings are available from KESSEL. 20 year polyethylene warranty.

Variant Note on installation depth: Shut-off valve: Disposal variant: Shredder-Mix-System: Inspection window:

Ground installation frost-free depth 1700 mm yes Auto Mix & Pump yes no

Nominal size (NS): SonicControl: Disposal system: Refill inlet in accordance with DIN 1988: Type of disposal: Water supply: Sampling device: Load-bearing capacity (DIN 19901):	1 no Disposal pump yes automatic disposal and cleaning system 2 solenoid valves 1" Type NBG E4
General characteristics Standard:	EN 1825
Dimensions Net weight: Gross weight: Groundwater resistant from lower edge of base section: Diameter: Max. length: Installation depth: Required access area, length: Required access area, width: Packaging dimension: Packaging dimension:	440 kg 460 kg 3000 mm 659 mm 2790 mm 1520 - 1700 mm 1425 mm 1235 mm length width height
Tank/drain body Distance pipe bottom outlet to tank bottom: Distance pipe bottom inlet to tank bottom: Outlet nominal size (OD): Outlet nominal size (DN): Inlet nominal size (OD): Inlet nominal size (DN): Connection inlet/outlet sockets: Clear width of tank (LW): Clear width of entry (LW):	595 mm 705 mm 110 mm 100 mm 110 mm 100 mm PE-HD pipes in accordance with DIN 19537, PVC-KG pipes in accordance with DIN 19534, PP or AS 1000 mm 600 mm
Coverage features Type of cover: Cover material: Colour of cover: Locking: Load class: Tightness:	Cover plate Grey iron black locked D 400 (EN 124) odour-tight and surface water resistant
Wastewater contents Separator contents: Total volume: Contents of sludge trap:	230 เ 370 เ 140 เ

70 l

Pumping device Pump:	SPF 300 IP68
Number of pumps:	1
Weight, pump:	44 kg
Connection type:	Direct connection
Protection class:	1
Insulation class:	F
Protection class (pump):	IP 68
Temperature monitoring:	integrated
Max. temperature (permanent) of conveyed	40 °C
material:	
Max. pumping capacity:	60 m³/h
Max. pumping height:	17 m
Speed:	2850 U/min
Power P1:	3,6 kW
Power P2:	3 kW
Operating mode:	S2 - 30 min.
Type of pump connection cable:	H07RN-F 7G 1.5 mm ²
Impeller type:	Radial impeller with macerating system
Length of mains cable for pump:	5 m
Rated current:	6,2 A
Control	
Control unit:	yes
Motor protection switch:	yes
Type of fuse required (RCD):	30 mA
Protection class control unit:	IP 54
Mains frequency:	50 Hz
Operating voltage:	400 V
Connection type:	Direct connection
Potential-free contact:	yes
GSM interface:	no
USB interface:	yes
Log book function:	yes
Multi-line display:	yes
Battery buffering:	no
Self-diagnosis system (SDS):	yes
Type of fuse required (control unit):	Fuse protection through control unit 400 V
