The Adventure pool in Würzburg offers several adventure and sports pools, tube slide, steam bath, large sauna area and integrated vitality gastronomy – a perfect leisure experience. The more than 160 floor drains from KESSEL ensure that the water that accumulates in all corridors and in the shower and sanitary areas can drain away without any problems. Our durable Ecoguss drains with Variofix thin-bed attachments were installed for this purpose. This not only ensures that the floor surfaces are cleaned regularly, but also that all guests can move around the entire building without slipping and nothing stands in the way of a carefree bathing experience.

Selection Criteria

- Universal modular system for diverse use cases
- Compliance with all relevant fire protection and sound insulation requirements
