Installation example grease separator EasyClean ground Auto Mix & Pump NS 30

With the new “Agnes” building project, the Kantonsspital Baden (KSB) is completely rethinking the day-to-day running of the clinic and concentrating its medical expertise on a state-of-the-art health campus. In addition to extensive visitor catering and a staff restaurant, a canteen kitchen is also integrated into the new building complex. The custom designed grease separator manufactured from heavy-duty twin walled reinforced pipe not only takes into account the specific installation situation but also offers fully automated grease separator operation and demand-oriented disposal.

Selection Criteria

- Fully-automatic and program-controlled disposal is possible
- The disposal intervals can be lengthened by permanent monitoring using the SonicControl layer thickness measuring device
- Reliable disposal of large wastewater quantities
- Individual solutions for specific room/use requirements
- Integration in a digital building management system
- Compliance with strict wastewater values
