Design drain "Invisible"

White sandy beaches, azure water – Vakkaru Resort on the Maldives is a real holiday paradise. The upmarket guests are accommodated directly at or even above the water. High-performance drainage solutions from KESSEL guarantee that nothing disturbs the holiday of a lifetime. To realise this, 720 Invisible design drains and 33 stainless steel cleaning closures were installed in the accommodation and restaurants. The 60 lifting stations and 13 pumping stations pump out the wastewater professionally. Due to the special requirements on the island, a customised solution was implemented for the pumping stations.

Selection Criteria

- Highest hygiene standard thanks to Ferrofix stainless steel drains
- Individual and concealed design of the installations in the rooms by using tileable upper sections
- Individual solutions for specific room/use requirements
- Coordinated complete system of separator, lifting station and accessories from a single source
- Extensive services from the design to operation of the installation

Products Used In Reference Object

- Aqualift F Compact lifting station
- EasyClean free Auto Mix & Pump
- System 100 upper section
