Lindebjergskolen is a climate school. Pupils here get to know the best solutions in connection with climate change – in the fields of energy, rainwater and much more. In terms of drainage, they rely on the KESSEL hybrid lifting station Ecolift XL which requires little to no power during operation.

### Selection Criteria

- 20-year guarantee on PE material for long-term investment security
- Quiet, energy-saving operation achieved by using the natural gradient to the sewer
- Individual solutions for specific room/use requirements

### Products Used In Reference Object

- Ecolift XL backwater lifting station, Mono mot. flaps
