44 × Fire protection insert *Fire-Kit*,

64 × Passage seal *Quick-Fit*

9 × Drain body *Ferrofix*, 2 × Channel drain *Ferrofix*

Modern, sporty, versatile - this is how the Oberlahnbad in Weilburg presents itself. With several swimming pools, panoramic sauna, steam bath, relaxation rooms and gastronomy area, no wishes remain unfulfilled. The special highlight: In summer, the glass walls can be opened to the outside terrace, the adjacent area can be used as a sunbathing lawn and the pool can be used as a covered outdoor pool. The planners did not make any compromises in terms of drainage technology either, and implemented a hybrid concept with drains made of stainless steel and the innovative material *Ecoguss*.
